Professional Summary

Aspiring Web Developer and Engineering student skilled in HTML, CSS, JavaScript, UI design, and beginner-level robotics. Built and deployed interactive websites, browser games, and creative digital projects. Experienced in freelance work, responsive web design, and Arduino-based projects with a strong interest in building practical and visually engaging products.

Technical Skills

- **Languages:** HTML5, CSS3, JavaScript
- **Web Development:** Responsive Design, UI/UX, Animations, GSAP
- **Tools & Platforms:** Git, GitHub, VS Code, Vercel
- **Creative Skills:** Video Editing, Graphic Design, Visual Storytelling
- **Hardware & Robotics:** Arduino, Sensors, Servo Motors

Experience

Freelance Creative Developer & Editor — Fiverr

Nov 2025 – Present

- Developed responsive websites and interactive UI projects using HTML, CSS, and JavaScript
- Delivered real client-based projects including a complete Turf Tournament website
- Edited short-form videos and designed creative visual assets
- Worked independently on client communication, project delivery, and revisions

Community Growth & Content Fellow — PrettiFlow

Apr 2026 – May 2026

- Assisted in community outreach and content promotion activities
- Gained exposure to startup growth strategies and audience engagement

Projects

Slice Frenzy — Browser-Based Game

- Built a fruit slicing game using JavaScript and Canvas API
- Implemented collision detection, score tracking, particle effects, and increasing difficulty

Turf Tournament Website

- Designed and developed a responsive sports tournament management website
- Added match scheduling UI, team listings, and modern interactive layouts

FunHub — Interactive UI Playground

- Created multiple interactive UI experiments and animations
- Focused on creative frontend development without frameworks

Robotics Projects

Sensor-Based Autonomous Motor Car

- Developed an Arduino-based obstacle avoidance motor car using sensors
- Worked on motor control logic and autonomous movement systems

Servo-Controlled Robotic Arm

- Contributed to a robotic arm project using servo motors and programmed movement
- Focused on mechanical coordination and control systems

Achievements

- Selected as Goalkeeper and Left Defender for Zonal/National-Level Football Camp
- Completed Artificial Intelligence and Generative AI certifications through Infosys Springboard
- Built and deployed multiple live web development projects
- Completed Robotics Summer Camp Training and practical Arduino projects
- Delivered freelance client projects independently through Fiverr

Education

J. Milton Public School	2024 – 2026
Senior Secondary Education (PCM)	
St. George’s School Unit 2	2013 – 2024
Secondary Education
